GROW BOOSTER

Dutch craftsman insist it produces astonishing results.

This transformational liquid dramatically improves plant growth and flowering. Its precious and effective ingredients help renew, rebuild and strengthen plant appearance, as well as elevating natural levels of aromatic compounds, enhancing colour, aroma and resin production.

THE TIME WAS RIGHT TO TRY
SOMETHING NEW. THE EFFECT
ON MY PLANTS HAS MADE THIS
AN INSPIRED DECISION. 55

FORMULA

Quickly increases biomass and amplifies aromatic compounds.

Formulated with a high concentration of powerful botanical ingredients, Reiziger Grow Booster empowers your plants with the energy they need to fortify their natural defences and increases floral weight and potency.

Thanks to natural surfactants, this luxurious formula penetrates rapidly to thicken stems and strengthen branches in readiness for heavier yields. Dutch craftsmen rely on the ability of Reiziger Grow Booster's refined minimalist formula to increase biomass, elevate aromatic compounds and enhance colour, aroma and resin production.

TECHNOLOGY

Easily absorbable b complex vitamins produce strong new root growth.

This powerful solution is fortified with a medicinal plant extract that amplifies the plant's immune system and helps cultivate crops covered with glistening, resin-drenched glands. In addition, easily absorbable B complex vitamins produce strong new root growth and double as yield boosting compounds.

Saponin, a natural and safe wetting agent, reduces the surface tension of this valuable liquid so it can easily feed your plants flower-boosting compounds through the roots and leaves.

PERFORMANCE

Rejuvenate your plants and reap the rewards.

A few days after application, plants look rejuvenated and gleam with a healthy radiance.

Over time, plants appear seemingly unstoppable with an increased capacity to support bigger, heavier buds.

- 01 | Enriched with medicinal plant extracts that elevate your plant's immune system.
- 02 | Phytoactive ingredients increase giving maximum yield of the desired active compounds.
- 03 | B vitamins and medicinal plant extracts work together to help floral development.
- 04 | Medicinal plant extracts give plants the ability to focus energy on repair and rejuvenation.
